# 1 Our Areas of Impact

## 2 Message from the Interim National Director

### Chumreap Sour!

Dear Supporters, Partners, and Friends of Habitat for Humanity International in Cambodia,

As I reflect on the significant milestones and challenges of the past year, I am filled with gratitude for the unwavering commitment and dedication shown by each member of our Habitat for Humanity family. In 2024, we continued our mission to build strength, stability, and self-reliance through shelter, even amidst unprecedented global circumstances.

Our work in Cambodia has always been about more than just constructing houses; it's about transforming lives and communities. This year, despite facing obstacles such as the ongoing effects of the pandemic and environmental challenges, we have persevered, adapted, and continued to make a lasting impact.

One of our proudest achievements this year has been the completion of the 'Home for All' initiative, where we successfully provided safe and decent housing solutions to over **2,374** families in underserved communities. This significant milestone is a testament to the power of collaboration, innovation, and unwavering determination in adversity, and it's something we can all be proud of.

The spirit of volunteerism and community engagement that defines Habitat Cambodia has been particularly evident in our Young Leader Build program, where all students from all walks of life came together to empower each other and build homes, hopes, and futures for those in need. This program brought about tangible change and fostered a sense of unity and empowerment among participants.

Looking ahead to the future, we are committed to further expanding our impact and reach across Cambodia through our new strategic framework, **"Build and Influence."** Our focus on sustainability, resilience, and inclusivity will guide our efforts as we strive to create a world where everyone has a decent place to live.

None of this would have been possible without the generous support of our donors, the hard work of our volunteers, the dedication of our staff, and the enduring spirit of the communities we serve. Your contributions, big or small, have been integral to our success. Together, we have shown that by working hand in hand, we can build a brighter, more inclusive future for all.

Thank you for your continued support, belief, and partnership in our shared mission. Together, we are transforming communities, one home at a time.

With gratitude and hope,

A handwritten signature in black ink, appearing to read 'Suon Sopheap', with a large, elegant loop at the beginning.

Suon Sopheap  
Interim National Director  
Habitat Cambodia

# 3 Our vision, our mission, our principles

## Our vision

A world where everyone has a decent place to live.

## Our mission

Seeking to put God's love into action, Habitat for Humanity brings people together to build homes, communities, and hope.

## Our principles

Demonstrate the love of Jesus Christ

Focus on shelter

Advocate for affordable housing

Promote dignity and hope

Support sustainable and transformative development

## 4 About Habitat for Humanity International in Cambodia

Since 2003, Habitat for Humanity International in Cambodia (Habitat Cambodia) has assisted over

**177,300**  
families

in enhancing their living conditions. This broader housing impact includes improvements in livelihoods, health, education, mental well-being, protection, social cohesion, and partnerships with a diverse range of international and local non-governmental organizations, microfinance institutions, corporate partners, and local and national authorities.

## 5 Cambodia at a Glance

# 6 Habitat Cambodia Strategic Framework

## Habitat Cambodia Strategic Framework

Mission	Seeking to put God’s love into action, Habitat for Humanity brings people together to build homes, communities and hope.			
Vision	A world where everyone has a decent place to live			
Goal	By 2030, at least 750K people in Cambodia thrive in adequate, equitable and resilient housing			
Key Initiatives	Build adequate, equitable, and resilient housing.		Influence policies, systems and norms that affects housing through constructive engagement***	
	1) HOME-LIFT: (Livability, infrastructure, and tenure transformation for urban and rural development) 2) Community Resilience.		1) Governance, inclusion, and market development.	
Drivers	Habitat responds to the stressors and shocks that allow the housing deficit to persist and grow			
	Urbanization	Policy and Governance	Climate change and disruptive events	Poverty and economic development
Target Populations	Habitat works with people whose housing conditions are inadequate due to systemic exclusion and vulnerability			
	Informal Settlers	Women and Vulnerable*	Low Income**	

## BUILD & INFLUENCE

*Using a housing ecosystem and people-centered approach, Habitat Cambodia co-creates and implements inclusive and equitable housing solutions to unlock increased and broader social impacts*

**Ways of working:** direct implementation, advocacy, market system, volunteering, partnership,

**Cross-cutting themes:** Integrates influencing, gender, and environmental considerations and harnesses technology and volunteering in projects, initiatives, and innovations

**\*Vulnerable:** e.g., Orphans and Vulnerable Groups (Youth and Children), poor(USD2.75/per day per person and below), persons with disability, older persons, indigenous people, migrants – MOST HOUSING AT RISK

**\*\* Low Income:** those households earning above the poverty (USD2.75/per day per person up to a max that RGC\* define as low income

**\*\*\* Constructive engagement:** (a) is the exercise of power by organized citizens towards the common good, processes that bring together stakeholders to act on a concern put forward by citizens in an organized fashion to produce reforms for governance. (b) an approach to advocacy for social change and transformation that seeks a reciprocal relationship between civil society and institutions in governance based on mutual respect, trust, legitimacy, transparency, and competency

APPROACH

# 7 FY24 Habitat Cambodia Served

In FY2024, Habitat Cambodia has served

**2,374**  
households

to improve their living conditions through housing interventions, WASH facilities, and community development programs.

**44** New houses

**54** Repairs & Home Improvements

**06** Upgraded houses

**104** Total House build

## 8 HOME-LIFT:

### 8.1 Improve Lives Through Housing

Rem has been living with a disability for over 30 years after stepping on a landmine while working in the rice fields. Although she relies on a walking stick, she has always worked hard to support her 13 children. Life became even more challenging when her husband passed away a few years ago.

Before receiving a new home from Habitat Cambodia, Rem and her 11 family members lived in a cramped, leaky hut. Now, their lives have improved with a larger and more stable house. Rem is thrilled that her children and grandchildren have enough space to sleep comfortably, and she can start saving money by avoiding constant repairs.

“Receiving this new house feel like a second chance of my life, at 60, I have never expected to be able to afford such a large and sturdy home.”

“Now, I do not have to worry about my house would be leaking or it could be collapsing anymore.” – Rem

**8.2 Improve Lives  
Through Participatory  
Approaches for Safe  
Shelter Awareness**

**124**

**Members**

**(53 females) PASSA**

**10** groups (PASSA and producer groups)

working to address communities needs and challenges regarding climate change, disaster, and livelihood insecurity The Participatory Approach for Safe Shelter Awareness (PASSA) is a community-based method aimed at reducing disaster risks, specifically focusing on shelter safety.

In the fiscal year 2024 (from July 2023 to June 2024), Habitat Cambodia collaborated with its partners to establish and train a total of 10 PASSA groups in rural and suburban communities, which included a total of

**124** members, with

**53** women

participating. The PASSA groups implemented its nine projects that were funded partially by Habitat Cambodia and partially by local authorities and the communities themselves.

The PASSA's projects were renovating roads, improving small-scale drainage systems, building bridges, improving handwashing facilities, and providing clean water in schools and communities. As a result of these efforts, 1,819 households benefited, impacting a total of

**9,382** individuals, including

**4,744** women.

Additionally, the PASSA groups played a crucial role in coordinating with local authorities to integrate the priority needs of the communities into commune investment plans and promoted the provision of access to land tenure rights.

## Improve Lives Through Infrastructure and Solidarity

As part of the BRRC project in Sdau commune, Habitat Cambodia established a 21-member PASSA group, primarily composed of women, to tackle disaster management and infrastructure issues. The group prioritized reconstructing a deteriorated bridge essential for transportation and local economic activity. With

**\$3,000**  
funding

from BRRC and additional community contributions, a durable 9x4-meter wooden bridge was built at a total cost of

**\$3,375.**

The new bridge,

designed to withstand harsh weather, has significantly enhanced access to markets, schools, and medical services, fostering community solidarity and driving economic and social progress.

## 8.3 Improve Lives Through Tenure Transformation

**161**

Households receiving secure land tenures

**27**

Households receiving land titles

**136**

Households receiving land receipts

## Securing a Future: Lor Edh Community

In April 2024,

**27**  
families

from the Lor Edh Aphiwat community group in Battambang City celebrated an important milestone as they received official land title certificates from the government. This achievement resulted from years of advocacy and collaboration between the community, local authorities, and Habitat Cambodia.

“ I used to worry constantly about the possibility of being relocated again, but now I’m grateful for the security that my land title certificate provides. This is a blessing for my heritage, ensuring a stable future for my children and grandchildren. I will do everything in my power to protect my land and home, and I won’t give up.”

Yip Say, 78, Lor Edh villager.

# 9 Community Resilience

## 9.1 Building Sustainable Communities

Habitat for Humanity and UN-HABITAT highlight that adequate housing is essential for achieving the Sustainable Development Goals (SDGs). Adequate housing goes beyond basic shelter and includes aspects like privacy, security, infrastructure, and accessibility to services. This comprehensive perspective helps enhance resilience, health, and education while fostering community cohesion and supporting economic stability. In Fiscal Year 2024, Habitat Cambodia focused on transformative changes in housing, sanitation, disaster resilience, and community empowerment through various initiatives, making significant progress in sustainable development and improving the quality of life for many individuals.

The table below highlights the key outcomes of our initiatives in FY24, showcasing the positive effects we've had on families and communities in line with the Sustainable Development Goals (SDGs). It emphasizes our efforts that go beyond just housing, reflecting both the direct and indirect contributions we make toward the SDGs, which are driving change and enhancing the resilience of sustainable communities.

### DIRECT contribution to goals:

**SDG 11 – Sustainable Cities & Communities:** Housing drives social, economic, and environmental progress. Habitat Cambodia builds and upgrades homes, roads, drainage systems, and solar lighting, strengthening both urban and rural communities. We also improve informal settlements and collaborate with stakeholders to promote affordable housing solutions.

**SDG Goal 6 – Clean water and sanitation:** Access to safe and affordable water and sanitation is a human right and a vital component of healthy and adequate housing. Habitat worked with local authorities and PASSA team to build school water tower and handwashing facilities connected families to clean water and toilets.

**SDG 13 – Climate Action:** Sustainable housing helps combat climate change. Habitat Cambodia builds resilient homes designed for Cambodia's tropical conditions, reducing risks and strengthening communities against environmental shocks. We also provide disaster preparedness training to equip villages with climate-adaptive practices.

### INDIRECT contribution to goals:

**SDG 1 – No Poverty:** Adequate housing reduces vulnerability to economic, social, health, and climate-related challenges. Habitat Cambodia builds safe, stable homes and partners with stakeholders to advocate for affordable housing, land rights, and sustainable livelihoods.

**SDG 4 – Quality Education:** Safe, stable housing creates better opportunities for students to learn and thrive. Habitat Cambodia supports education through training programs and capacity-building in sustainable development, disaster preparedness, and quality construction. We also organize awareness events on housing laws, health, and climate, empowering communities with essential knowledge and skills.

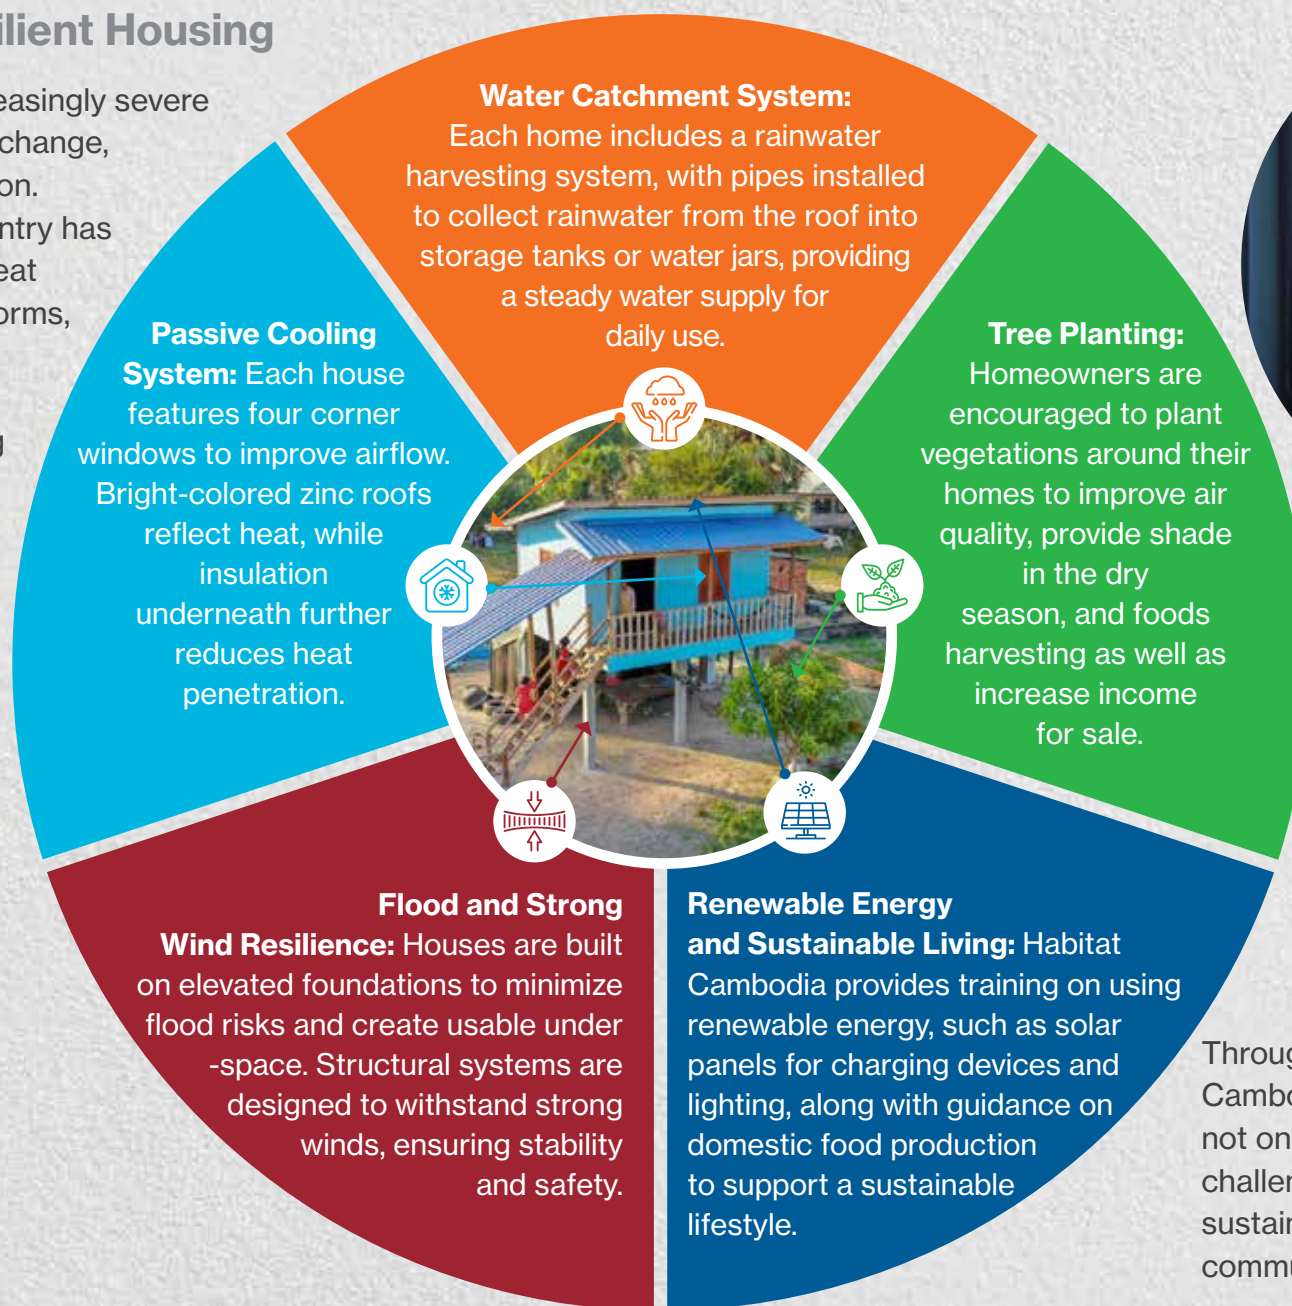

**SDG 3 – Good Health & Well-Being:** Safe, stable housing is essential for physical and mental health. In FY24, Habitat Cambodia built climate-resilient homes, toilets, school water towers, and handwashing facilities, while providing training and COVID-19 prevention kits – benefiting families, students, and entire communities.

**SDG 9 (Industry, Innovation, and Infrastructure):** New technologies enable affordable, resilient, and eco-friendly housing solutions. Through our Community Resilience Program, we collaborate with PASSA teams and stakeholders to improve infrastructure in informal settlements – upgrading homes, toilets, installing solar poles, and introducing innovative agricultural techniques for homegrown food.

## 9.2 Climate-Resilient Housing

As the world faces increasingly severe weather due to climate change, Cambodia is no exception. In recent years, the country has experienced extreme heat waves, strong winds, storms, and floods across its regions. Habitat Cambodia's engineering team has taken on the challenge by designing climate-resilient homes for homeowners. Meet Soy Piset, Construction Coordinator, who shares five key strategies Habitat Cambodia uses to create homes resistant to climate impacts.

**Soy Piset**  
Construction  
Coordinator

Through these measures, Habitat Cambodia is building homes that not only withstand climate challenges but also foster sustainable and resilient communities.

💬 Compared to my old hut, the new house has a high ceiling and insulation under the roof that reduces heat by half. It features windows that allow fresh air to circulate and a downstairs room where I can relax during the day, so I don't have to rely heavily on an electric fan. The house also includes a water-catching system that saves energy and minimizes the need for a water-pumping machine. I believe this helps to save electricity. 💬 Chhit Rem, Siem Reap.

### 9.3 Sustainable WASH Solutions

**56**  
families

**230**  
individuals  
including

**130**  
females

have connected to the water pipe (improved water) from the local water station, which is operated and managed by the water committees in that community

**77** toilets  
built

**27** new toilets

**50** toilets  
constructed within  
the new and  
upgraded houses

Evaluation report showed, WASH and waste management initiatives, including education and facility improvements, led to positive behavioral changes among community members. Surveys and interviews confirmed better knowledge and practices in hygiene and waste management, contributing to healthier living conditions.

## Empowering the Community Through Hygiene Education for Children

As part of the Building Resilient and Empowered Community project, Habitat Cambodia and HelpAge Cambodia collaborated to construct disability-friendly latrines at Opongmon and Takream Primary Schools, which together served

**1,230**  
students

including four students with disabilities. These newly built, accessible facilities offer improved hygiene options for all children, promoting inclusivity.

The initiative not only enhanced hygiene practices but also supported students with disabilities and raises environmental awareness.

## Sustainable clean water solution for Soch Village

For years, Soch Village residents struggled to access clean water, often relying on unsafe sources or paying high costs for untreated water, leading to health issues like diarrhea. To address this, Habitat Cambodia, NTFP, and World Vision Cambodia constructed a clean water supply station in March 2024. With a

**\$51,499.63**  
investment

the station now provided affordable clean water (2,000 riels per cubic meter) to over

**62**  
families

reducing costs by 75% and improving health. Profits were reinvested into operations, maintenance, and community development, ensuring sustainability.

Based on the evaluation report, The Water Management Committee has shown strong ownership, successfully managing the station since February 2024 by collecting fees, developing financial rules, and building technical capacity. This project not only alleviated daily burdens and improved health but also strengthened community resilience, showcased the power of collaboration for sustainable development.

## 10 Build and Influence:

Through Build and Influence, we collaborated with NGOs and housing agencies to construct more homes for families. Our efforts also included training and advocacy aimed at strengthening community resilience by educating individuals on essential topics such as Water, Sanitation, and Hygiene (WASH) promotion, housing regulations, and COVID-19 health protocols. We reached 2,123 community members and students through effective awareness-raising events, emphasizing critical issues like WASH practices, housing rights, and COVID-19 prevention strategies.

### 10.1 Enabling Others to Build More (MAATCH)

The MAATCH (Mobilizing for Appropriate and Affordable Technology and Capital for Housing) project, launched in January 2024, aims to enhance shelter solutions and advocacy through strategic partnerships and matching funds. It presents opportunities to serve a broader community by leveraging various forms of capital – social, political, technological, and financial. By increasing the visibility of the housing agenda through effective collaboration and engagement, Habitat Cambodia is positioned as a credible leader and facilitator within the housing ecosystem. Additionally, the project seeks to respond effectively to offers of capital from stakeholders that can provide small to medium funding and programs, further strengthening its impact in addressing housing needs.

## Project Outcome Update:

In Phnom Penh: Partnering with Happy Chandara School to provide housing and agricultural support for female students and their families and with Planete Infants & Development (PE&D) to improve livelihoods, hygiene, and housing for poor families. Outcomes include building

**20**  
houses

**41**  
repairing

constructing walkways and drainage, and providing training for

**49**  
families

In Battambang: Collaborating with Tap Effect to deliver clean water access to

**457**  
displaced

households, enhancing sanitation and gender equality. The project also improved infrastructure through road and canal renovations, benefiting

**1,291**  
individuals,

and upgraded two houses with PASSA groups.

Alpha Yaya BAH  
Projects Manager Toutes à l'école

“ The goal of our NGO is to provide high-quality education to girls. We can't offer great education without a great space for them to thrive. This MAATCH project helps provide a safe space at home, enabling them to learn effectively. ”

“ Collaborating with Habitat Cambodia also allowed us to enhance the house design to be more climate-resilient while staying true to Khmer cultural architecture. For example, we included living spaces on the ground level and designed the house at an elevation of 2.25 meters to support agricultural activities. Habitat Cambodia has helped us refine house designs and provide solutions that make homes more adaptable to climate change. It is totally an inspiring work! ”

## 10.2 Collaborating for Solutions: Workshop on Cambodia's Affordable Housing Challenges

Cambodia faces a projected shortfall of

**1.1 million**  
affordable

homes by 2030. To address this, a November 2023 workshop in Siem Reap, organized by UN-Habitat, Habitat Cambodia, and the General Department of Housing, gathered 94 stakeholders to discuss housing challenges, partnerships, and resource mobilization. Key outcomes included plans for a working group, strategic planning, and strengthened collaboration for sustainable housing solutions.

## 10.3 The NGO Housing Network in Cambodia

The Housing Network in Cambodia, initiated by UN-Habitat and Habitat Cambodia with support from the General Department of Housing, seeks to enhance collaboration and engagement among NGOs and stakeholders in the realm of affordable housing. This initiative addresses the pressing need for

**1.1 million**  
new homes

by 2030, creating a cohesive platform to confront the housing challenges in the country. While government policies have promoted affordable housing, high costs still

hinder  
**60%**

of the population from accessing it. The network's goal is to unite NGOs, encourage partnerships, and advocate for accessible housing solutions. It focuses on sharing best practices, cultivating partnerships, and boosting the capabilities of NGOs. The initiative aims to align the efforts of NGOs with government strategies, foster collaboration, and strengthen relationships to address the housing issues faced by low-income and vulnerable communities.

## 11 Amplifying Social Impact Through Volunteering

**515**

**Volunteers  
Total number**

**237**

**Global  
Volunteers**

**278**

**Domestic  
Volunteers**

## Habitat Young Leader Build 2024:

Just a week before Khmer New Year on April 7, 2024, Habitat Cambodia held the Habitat Young Leader Build 2024 event, which brought together

**162**  
volunteers

from various international schools. The volunteers joined forces in Sangkat Trapeang Krasaing, Khan Porsenchey, Phnom Penh, to support seven families through activities such as building homes, painting houses and school fences, promoting hygiene, and cleaning the community. Their efforts showcased compassion and teamwork, leaving a significant positive impact on the families served. A big thank you was extended to all the volunteers for their hard work and dedication.

Supporting this initiative is truly commendable. It's essential for everyone to contribute to the betterment of our community. Many of you may be fortunate enough to enjoy a comfortable life, complete with a lovely home and quality education. Yet, there are those we've come to assist today who aren't blessed with these privileges. Therefore, I urge you to seize any opportunity to give back to our society. Thank you all for joining today.

Hang Manita, Miss Universe Cambodia 2022.

Jermaine

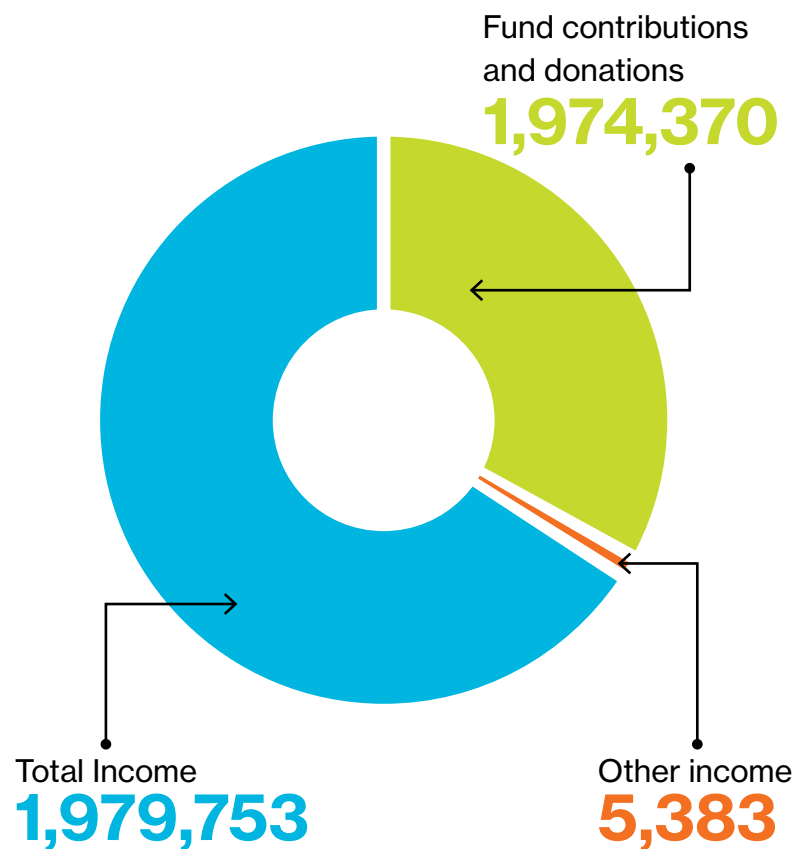

I am loving the experience of being able to help the community and help other people out. It is amazing and it is sort of my goal in life to build houses for other people while I am doing my degree, so when I grow up, I want to be able to help more people out in the type of community.
